Accents Rugs, Oriental Accent Rug, Accent Area Rugs 2006-07-21

A great way great way to add color and simple radiance to any room or space are with accent rugs. While very purposeful, accent rugs also allow for a fun and convenient way to reinvent any space. Vibrant colors, schemes and styles, help to anchor and define any area in a very strategic manner.

Accent rugs can be essential in pulling all of the design elements of a room together. They are key in breaking the monotony of larger area rugs within the same room. An accent rug works wonderfully in cozy nooks in larger rooms where small sitting areas can be created by gathering furniture around several rugs ranging in size from 2x3 to 3x5. Small areas can be brightened up with an accent rug. Use accent rugs to accentuate the floor. The accent rug will not only offer protection for your floors by providing an additional "walk-off area," but will also add a splash of color to complement your room's decor.
